

The Security Interest Group Switzerland is a peer-to-peer organization dedicated to helping information security, IT risk management, privacy, and compliance executives be more successful. We accomplish this mission by providing opportunities for those professionals to meet periodically in their local cities to share with one another and hear from industry experts.

Be part of this platform where today's professionals in information security will develop a new way of thinking to ensure success in protecting their respective organizations. The unique strength of this event is that **members can feel free to share concerns, successes, and feedback** in a one-to-one environment. We will unite all security professionals across Switzerland in the fight against cybercrime and information security threats!

Meet with and be inspired by professionals who face a similar set of challenges as you are. Share strategies for mitigating the most current information security threats. A friendly, relaxed and professional atmosphere will ensure that you leave this event with a new wealth of trust-based contacts and tangible takeaways.

This is a 'must attend' event for all security professionals! We are confident that the relationships you develop here will prove to be crucial to your continuing success.
