Testimonial

Excellent workshop with a lot of good hints, not only for security staff, but also for management in order to understand the nature of attacks and the mitigation of vulnerabilities in order to reduce the impact during an incident.

The expectation was exceeded, especially the examples from incidents and hits.

Claudia Zeuren, IT Security Expert at UBS CardCenter

Workshop Content

Can your business swiftly discover and then recover from a cyber attack? Most companies are unable to discover cyber criminals for an average of 200 days and many enterprises fall short after they discover their confidential and sensitive data has been breached.

To survive as a business, you must be able to lower your time to discovery and time to respond. Furthermore, the tactical and strategic planning required to deal with complex and dynamic cyber threat actors requires a different and efficient mind set.

- The “golden hour” and why it’s critical to managing an incident
- Effective incident planning & response strategies to tackle all types of simple and complex cyber attacks
- Strategies to design an early warning system to lower discovery time from months to days and actionable strategies, response plans & checklists to use today
- Understand how to define and baseline “Normal” within your organization
- Understand the business context on the technologies that underpin cyber incident response.
- Stop up to 90% of cyber attackers in their tracks
- Strategies and guidance on how to build an effective cyber response team
- Threat Intelligence for executives and how you can use it to defend your business

About the Trainer Amar Singh

- UK Government GCHQ Certified Trainer and creator of APMG & GCHQ Certified course CSPE (Cyber Security & Privacy Essentials)
- Creator and trainer of business focused Cyber Incident Planning & Response Course for middle to senior executives. (CIPR)
- Experienced cyber, information security & data privacy practitioner. Senior C Level Executive, Global Chief Information Security Officer, Expert in Information Risk Management
- Mentor & Trusted Advisor to FTSE 100 Firms, Startups & Incubator Funds
- Author, writer, industry speaker & presenter
