4. Intended Concept
5. Workshop / Survey

Company Overview

Facts and Figures

Company Overview

Locations

Company Overview

Facts and Figures

IT organization	Central (Switzerland), service-based
Locations	20 standardized locations, AM / EA (11 Producing Business Units / 9 Sales & Engineering Offices)
Employees / Computer Users	3200 / 1500
Industry Sector	Manufacturing
Net Sales (2016)	CHF 380M

Current Situation / Problem

Current Situation / Problem

- Risk Manager on ExB-level
- No security officer, done within the IT Network&Security service
- Few business requirements
 - In fact, they want a proposal from us
- Limited financial resources
- Security based on the best of our knowledge and belief
 - High availability, backups, regular software updates, malware protection, network segmentation, newsletters, policies, state-of-the-art configurations
 - Technical orientation / hands-on approach

Goals

Goals

HEADLINE: ARIAL NARROW, 25 PT; GREY

- Information Security Concept (proposal for our business)
- Reasonable Level of Security
 - Not limiting people in doing their work
 - Spend money only for what is needed
 - Security level based on the level of other companies in our industry

Intended Concept

Intended Concept

- Separate Slide

Workshop

Workshop / Survey

Open discussion

1. Does your company have a security officer (CISO, Risk Manager)?
If so, where in the organization is that person?
2. How are security requirements between business and IT being coordinated?
3. What is your current information security concept and what is your future strategy?
4. What are your companies biggest risks?
5. How much can you spend on IT security?
6. Do you use security metrics for internal leadership and benchmarking reasons?

THANK YOU!
